

# 1 Supported meshes

## 1.1 2D

Geometries composed of only **one** element type, the current types supported are **quadrangle** and **triangle**.

## 1.2 3D

Geometries composed of only **one** element type, the current types supported are **hexahedron** and **tetrahedron**.

Boundaries composed of only **one** element type, the current types supported are **quadrangle** and **triangle**. It is important to note that all boundaries must have the same element type.
